Monopressocottura Appiani
Appiani single press-firing
Monocuisson sous pression Appiani
Appiani Einpressbrandverfahren
Monococción por prensado Appiani
Монопрессобжиг Appiani
Appiani 一次压烧成形

La Monopressocottura consente di ottenere prodotti ceramici dalle caratteristiche pressocchè uniche: smalti e argille, precedentemente atomizzati, vengono uniti per compenetrazione mediante pressatura a secco. Il ciclo di cottura a temperature di oltre 1200 °C pone in risalto le eccezionali qualità estetiche, di durata e di resistenza del prodotto. Queste caratteristiche rendono tali prodotti ideali per molteplici applicazioni, sia in interno che in esterno, sia per pavimenti che per rivestimenti.

L'aspetto: lati perpendicolari e leggera stonatura della superficie smaltata, smalto totalmente coprente, lucido, opaco e naturale.

La manutenzione: lo smalto non trattiene lo sporco, igiene totale, facile pulizia.

Le caratteristiche: elevata resistenza agli urti, alle macchie e alle abrasioni, superfici resistenti agli agenti chimici e alle muffe.

La versatilità: adattabilità ad architetture di qualsiasi forma, cambia l'aspetto cromatico a seconda del fugante utilizzato.

L'ambiente: innovazione tecnologica, controllo delle fasi del ciclo produttivo, costante impegno per la tutela dell'ambiente, prodotti Appiani 100% made in Italy.

Single press-firing makes it possible to obtain ceramic products that are virtually unique: previously-atomised glazes and clays are combined by permeation through dry pressing. The firing cycle at a temperature of over 1200°C enhances the exceptional aesthetic qualities, long life and resistance of the product. These characteristics make the products ideal for a wide range of different applications, both indoors and outdoors, and for both floors and wall tiling.

Appearance: perpendicular sides and slightly rounded glazed surface, glossy, matt and natural.

Maintenance: glaze does not retain dirt, total hygiene, easy to clean.

Features: highly resistant to knocks, stains and abrasion, surfaces resistant to chemical agents and moulds.

Versatility: adaptable to any type of architecture, changes the appearance of the colour depending on the grouting.

The environment: technological innovation, control of the production cycle steps, ongoing commitment to environmental protection, Appiani products 100% made in Italy.

La monocuisson sous pression permet d'obtenir des produits céramiques dont les caractéristiques sont pratiquement uniques: des émaux et des argiles précédemment atomisés s'interpénètrent par pressage à sec. Grâce à un cycle de cuisson à des températures de plus de 1 200°C, les qualités exceptionnelles du produit en matière d'esthétique, de durabilité et de résistance sont rehaussées. C'est pourquoi ces produits sont particulièrement adaptés à de multiples applications, aussi bien à l'intérieur qu'à l'extérieur, qu'il s'agisse de réaliser un sol ou un revêtement mural.

L'aspect : côtés perpendiculaires et arrondi léger de la surface émaillée, émail totalement couvrant, brillant, mat et brut.

L'entretien : l'émail ne retient pas les saletés, hygiène totale, excellente nettoyabilité.

Les caractéristiques : résistance élevée aux chocs, aux taches et aux abrasions, surfaces résistant aux agents chimiques et aux moisissures.

L'éclatisme : prodigieuse capacité d'adaptation aux différents modules d'architecture. C'est un produit qui change de couleur en fonction du coulis de jointoiment utilisé.

L'environnement : innovation technologique, contrôle du cycle de production à toutes les étapes, engagement permanent dans la protection de l'environnement, produits Appiani 100 % made in Italy.

Das spezielle Einbrandpressverfahren verleiht keramischen Produkten fast einzigartige Eigenschaften: Glasur und Ton werden nach einer vorherigen Sprühtrocknung vermischt und durchdringen sich bei der Trockenpressung gegenseitig. Der Brennzyklus mit Temperaturen von über 1200°C ermöglicht die außergewöhnlichen ästhetischen Eigenschaften, die Haltbarkeit und Lebensdauer des Produkts.
