JUNGLE

Diffusion Céramique is glad to present you
this new haute couture collection!

These ceramic tiles are hand painted by our ceramic artist in Salernes, the capital of faïence in France.

The hand painting is done on non-fired enamel, the realisation of the design takes more than one hour. Once this artistic work has been done, the tile can go through the oven. Even though the design is the same, the way the brush was used and the marks it leaves make every tile unique.

Our artist got inspired by the wild jungle trend to design these very bold and colourful tiles.

Show your wild side with these Made in France gems! They will add a luxurious, prestigious and original touch to any room. ■
